Bespoke Steel Buildings

DESIGNED, SUPPLIED and ERECTED

Health & Safety.

It is vital that on all projects undertaken Town & Country has an established and effective Health and Safety policy. It is essential that it is proportionate to the hazards and risks which may occur on each and every job.

Town & Country have in conjunction with their safety advisors - Pearson & Holland, produced a Health & Safety management system to cover all aspects of good practice outlined in HSC 33, HS(G)65 & BS8800.

This will be implemented as necessary to cover all aspects relating to your building and monitored by our contracts manager - thus giving peace of mind for all concerned.

A copy of our Health & Safety booklet can be examined at our office or a smaller version tailored to your job will be available on commencement of your contract. Risk assessments and method statements will also be prepared and forwarded.
